CARS MUST STAY NEW

TO MEET THE NEW REQUIREMENTS

MITCHELL experts have spent two years in revising Light Six Standards, Important parts are made larger; all rital parts have been strengthened; there are new heat treatments, better materials, The engine, years, axles and transmissions are given new and radical tests. Scores of inspectors guard against delects or mislits.

Motor smoothness has been greatly increased. Cylinders are ground. Much waste of power is said. Crank shafts are twice balanced on the new tupe nauchines.

Fuel cost has been reduced. A Thermostat is added to control temperatures. Gasoline is capacized completely.

A new style body makes this car the handsomest in its class; new frame materials add staunchness to the body; the new grade top with plate glass windows is a top that stays new; the new tinish keeps its lastre.

There is a new-type disc clutch, a ball-bearing steering year; brake efficiency is increased by new, design; the long wheel base gives unusual room; tong cantilever rear springs make this by for the easiest riding Six, and ample tests have proved that use cannot break them.

WHAT THEY SAVE YOU These improvements succ you fust from the start. They save in upkeep for every part is built for supreme endarance. Yet, this new grade var, under Mitchell methods, costs out a modest price. It is built complete in a model factory, famous for efficiency. Come in and review it part by part. The changes will surprise your They will give you new respect for Mitchell ideals in ear building.
